Max Wax Newsletter

May 2022

..... and so, the adventure begins!

About Max Wax

It's made from the same base material as the top chainwaxes in the country, and then improved! Why did it need improving? Some products were prone to clogging up with continuous use negatively on lubrication and rust prevention. At **Max Wax** we are using a natural tackifier, orange oil, to overcome these issues. With **Max Wax**, you only need to lube a little, once every 10 hours of riding, and the product is also environmental friendly and fully South African manufactured and produced!

When to lube? The night before, **Max Wax** works best when given some time to dry and activate the tackifier. Although you can lube up just before the ride, best results are achieved by doing it the night before.

*Water/wax based Environmentally friendly Smooth shifting & pedalling No build up
No degreasing required Contains Orange Oils*

Why is cycling good for you

Regular cycling stimulates and improves your heart, lungs and circulation, reducing your risk of cardiovascular diseases. Cycling strengthens your heart muscles, lowers resting pulse and reduces blood fat levels.

Max Wax Tip of the month

Protect your head!

If you ever fall off your bicycle, you'll want to be wearing a helmet. If you're in a bike accident, a helmet could reduce your odds of a head injury by about 51%, and reduce your odds of a fatal head injury by 65%.

Upcoming cycling events:

- 30 July 2022 / Buffelstrap @ ATKV / North West
- 2 October 2022 / Boland Race of Truth / Western Cape
- 6 October 2022 / Tour du Nord 4 stage Road Cycling Race / Gauteng

From our Max Wax team, pedal, pedal, pedal, stay safe & enjoy!
